## SUMMARY

Hello, I am Nitin Patil, a budding web developer with a strong foundation in HTML, CSS, and JavaScript, Bootstrap for responsive design, and proficiency in using React.js to build interactive user interfaces. My knowledge of database management extends to SQL Server. Despite having no professional experience, I look forward to applying and expanding my skills in real-world projects. I am excited about learning and contributing to dynamic teams.

## EXPERIENCE

### Web Development

#### CodSoft

09/2023 - 09/2023

Completed a 1-month internship with Codsoft, successfully completing tasks assigned such as developing a landing page, calculator, and portfolio website. Demonstrated skills in coding and web development.

## EDUCATION

### Bachelor of Technology

#### GF's Godavari college of engineer ing

08/2021 - Present Jalgaon

### High School

#### Shri. G. R. Pandit Science College

08/2021 - Present Jalgaon, Maharashtra

## SKILLS

bootstrap

CSS

database management

HTML

Javascript

MySQL

PHP

React.js

SQL

SQL Server

## PROJECTS

### TextEditor

09/2023 - 11/2023

- Developed a user-friendly text manipulation tool for efficient and accurate text processing.
- Enabled text transformation, extra space removal, and uppercase/lowercase conversions.
- Enhanced content quality and saved time through improved text processing efficiency.
- Developed a tool enabling easy text copying and manipulation for improved productivity.
- Created a user-friendly interface for seamless text transformation and processing.

### Login & Signup form (Using PHP & MySQL)

09/2023 - 09/2023

GF's Godavari college of engineering Jalgaon

- Developed a user-friendly login and sign up form utilizing PHP and SQL.
- Implemented efficient authentication and data storage mechanisms for enhanced security. Demonstrated strong proficiency in designing and coding interactive web features.
- Applied best practices in database management and data retrieval for seamless user experience.
- Showcased passion for web development through the creation of a robust and functional login/signup system.
